DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kotraba et al (US 5,186,741). Kotraba et al discloses a method of recovering iron comprising initially depositing a layer of granular limestone or granular dolomite on a rotary hearth furnace then green pellets are fed the layer (col.1, lines 51 to 56) the green pellets having been made by adding water to a mixture of steel mill wastes and palletizing the wetted mixture (col.2, line 56 to col.3, line 27) which anticipates the claimed method.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9 and 10 are indefinite because it is unclear exactly what is being reduced since the composition of the pellets does not include the material being reduced.

In Claim 9 the expressions "rotary-bed-type reduction furnace" are indefinite because the expression "type" is relative terminology which is indefinite.

MPEP 2173.05 (c) E.

Election/Restrictions

Applicant's election with traverse of Group I in Paper No. 7 is acknowledged. The traversal is on the ground(s) that set forth in Paper No.7. This is not found persuasive because applicants have not denied that the apparatus as claimed may be used for other purposes such as a method of reducing dried pellets as exemplified by Beggs et al (US 3,365,339) which discloses a process comprising drying pellets in an updraft-downdraft drying pre-heating furnace 2 and then pre-indurating the dried pellets in a rotary hearth 4.

The requirement is still deemed proper and is therefore made FINAL.

Claims 11 to 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.
